FARMVILLE.

The wedding bells and the funeral dirge have been heard in our midst of late and the flowers and the bier have passed in review before us. One glad procession has moved to the altar, and the other broken and sad, has gone to the grave. Sunshine and shadow, strange mingling and yet inseparable is made up of just such things as these. A young girl has donned a ... Nothing of table ... and ... ing and the conversation ... their companions ... King Edward ever had ... a duke on his table? If not, ... very jealous.

... Cut and Save It

... two hours pulling one horse in ... and yet tax payers do not stop to consider the burdensome load ... tax, or else our law makers, State and National would be driven to do ... some speedy and sure remedy ... lief. The one question in the daily ... is the question of the day and yet a ... deal with it as though it was a dead issue. The people would do well to stop ... patent medicines and begin ... themselves. This is the country of, by and for the people and they should guard it as a precious heritage, a priceless treasure.

I met a friend the other day who had received a severe cut from a "safety razor." It is in order to the manufacturer to make an explanation, as compared by safety directions.

Mr. and Mrs. J. N. Long have returned from a pleasant visit to Florida. During the absence of the cashier, Mr. J. L. Bugg, the assistant cashier managed the affairs of the First National Bank with skill and ability.

Our local politicians are experts at hand shaking and glad greetings. They are all out, sunning at in advance of the spring birds.

Neither winter cold or summer heat drives our town mule and cart from the daily work of street cleaning. It is hard to estimate their value.

I was in Lunenburg the other day and met with an old friend who was in the habit of being ... years ago. He began to ask me ... the business men he was ... to meet with in those days and ... greatly ... Returning home ... number who had "passed over the river." Here are some of those ... named: Warren, Hillard, ... Blanton, Paulette, Rice, Evans ... Gray, Wright, Booker, Price ... Johnson, Anderson, Walker, Farrar, Jenkins, Sydnor, Roberts. All dead, and their graves are growing old, and soon to join those in the great beyond. In those days the Lunenburg patrons were contributed largely to the trade of Farmville and our representatives from business circles attended regularly the courts of that county.

I heard a bird chirping away in a tree top, and surely spring cannot be far behind. Those ... is the ... ever who is in the ... we are ... with the cool man ... the season ... will find that they are in great error.

Mr. H. K. Cowan, Farmville ... veteran printer has been on the ... sick list since Christm ... He has worked at the case for more than thirty years and to man has ever been more faithful in the discharge of his daily duty.

St. Valentine got in his usual work, and in some cases caused unnecessary pain.

The town Council, at its last meeting, discussed the propriety of closing poo rooms at 10 p.m. High time for everybody to be at home is not in bed. Our business men are early risers, and no doubt early to bed.

Strange to say I never saw a bottle of freeze Farmville Lithia water. Our people are so fond of it that they nurse it and keep it warm.

That farmer, of whom your Sheppard's correspondent wrote with more than eleven hundred ... pins in bank from this year's sales excites my admiration and wins my congratulations. More to be envied is such a man than a multi millionaire. I warrant is sleep ... restful and his digestion good. And of these luxuries Rockefeller can't boast.

No one of the Farmville industries closed on account of the panic, nor did our banks resort to the use of scrip. Big, busy Pittsburg can't say as much.

Celery and salsify are both luxuries much in demand and it is pay...

...ing evidence that so few of our gardeners undertake to grow the former. It requires care, but anything with the having requires that.

Farmers with ice houses are upon it with the summer luxury, but with the Byrd bill in force there will be ... julips.

I do not know how much tobacco our friends have in the Association, but as the seed has been ... ding ... is an open market ... has been great temptation ...

Low ... temptations are with us ... and I only wish they were ...

...
